DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, drawn to a method for applying toppings to bakery goods.

Group II, claim(s) 7-14, drawn to an apparatus for applying toppings to bakery goods.

Group III, claim(s) 15-22, drawn to an apparatus and method for transporting granulated material.

The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: All of the groups are directed to a method and apparatus useful in the general field of coating items, but each group has different special technical features. Groups I and II have a special technical feature directed to a method of coating bakery items not required in Group III. Group II has a special technical feature directed to a method and apparatus for transporting granulated material, not required in Groups I

and II. Claim 1, at least, is anticipated by or obvious over Cordera (5,707,448). Consequently, the special technical feature which links Group I and II does not provide a contribution over the prior art, so unity of invention is lacking. The claims in Group III lack the 2-step coating process and apparatus of Groups I and II entirely.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
